PALLET RACKING SYSTEM

One of the most widely used systems for the pallet storage available today,

Designed for strength, ease of assembly and operational reliability.

The XL system comprises a comprehensive choice of frames and pallet support beams which are combined to meet the load requirements of any storage application

1- Wide Aisle

2- Very Narrow Aisle (VNA)

3- Drive-In / Drive-Through Racking

4- Semi-Automated Storage Systems

5- Cantilever Racking System

6- Double Deep

WIDE AISLE

Standard racking systems allowing easy access with forklifts.

VERY NARROW AISLE (VNA)

Optimizes storage space by reducing aisle width, requiring specialized handling equipment.

DRIVE-THROUGH RACKING

High-density storage systems allowing forklifts to enter the rack structure.

CANTILEVER RACKING SYSTEM

Optimizes storage space by reducing aisle width, requiring specialized handling equipment.

SEMI-AUTOMATED STORAGE SYSTEMS

Combines manual and automated processes to enhance storage efficiency.

DOUBLE DEEP

SHELVING SYSTEMS

1- Light Duty Shelves

2- Mobile Shelving System

3- Long-Span Shelves

4- Medium Span Shelves

LIGHT DUTY SHELVES

MOBILE SHELVING SYSTEM

LONG-SPAN SHELVES

MOBILE SHELVING SYSTEM

Mobile shelving system is a movable storage shelf that is fixed on wheels and the wheels are sliding on the lane across the floor. The main purpose of the mobile shelving system is to eliminate wasted space and optimizing the filing capacity.

Opening and closing the compactable shelves is easy to do with controls that facilitate aisle movement. Using a push-button or turn handle, you can eliminate wasted space and store more in a footprint half the size to improve efficiency.

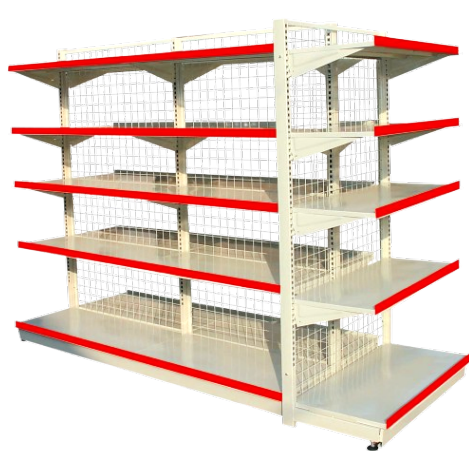

Mobile shelving systems provide a space-saving storage solution for better use of the spaces in the offices, gaining twice the storage of documents and files in an existing area. Controlling the shelves is uncomplicated by the controlling unit on the frame used to open and close the shelves. By opening the shelves you can make an aisle for the desired shelves. Eliminating the fixed aisles, has a great result to optimize the storage density.

MEDIUM SPAN SHELVES

RETAIL SHELVES

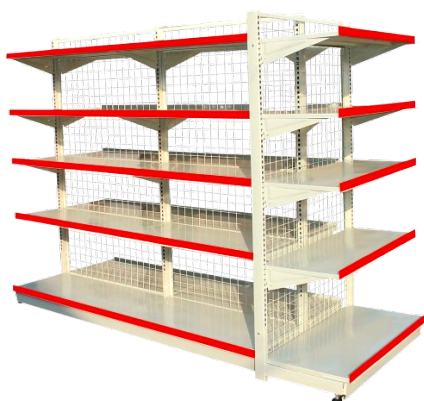

SUPERMARKET SHELVES

Supermarket shelves are essential fixtures for organizing and displaying products, optimizing space while enhancing accessibility. Available in a variety of sizes, materials, and configurations, they cater to different product types.

Metal shelves are ideal for storing frozen goods, wooden shelves are perfect for displaying premium products, and plastic shelves are commonly used for everyday items. Each type of shelf is designed with specific materials to ensure efficient organization and a visually appealing shopping experience.

SUPERMARKET SHELVES

OFFICE FURNITURE

Office furniture is designed to provide comfort, functionality, and organization in a professional environment. Available in various styles and materials, such as ergonomic chairs, spacious desks, and storage solutions, each piece is crafted to enhance productivity and create an organized, efficient workspace.

PHARMACY DRAWER SYSTEM

The Pharmacy Drawer System is designed with durable materials like high-quality metal and plastic to ensure long-lasting performance and easy maintenance. The drawers and shelves are built for smooth sliding and can be customized to accommodate different medication sizes. This system maximizes organization and accessibility while providing a safe and secure storage solution for pharmaceutical environments.

PHARMACY DRAWER SYSTEM

METAL LABORATORY CABINETS

Metal Laboratory Cabinets are designed for durability and security in laboratory environments. Made from high-quality steel, these cabinets provide sturdy storage for chemicals, equipment, and tools. With secure locking mechanisms and adjustable shelves, they ensure safe organization and easy access, making them an ideal solution for any laboratory setting.

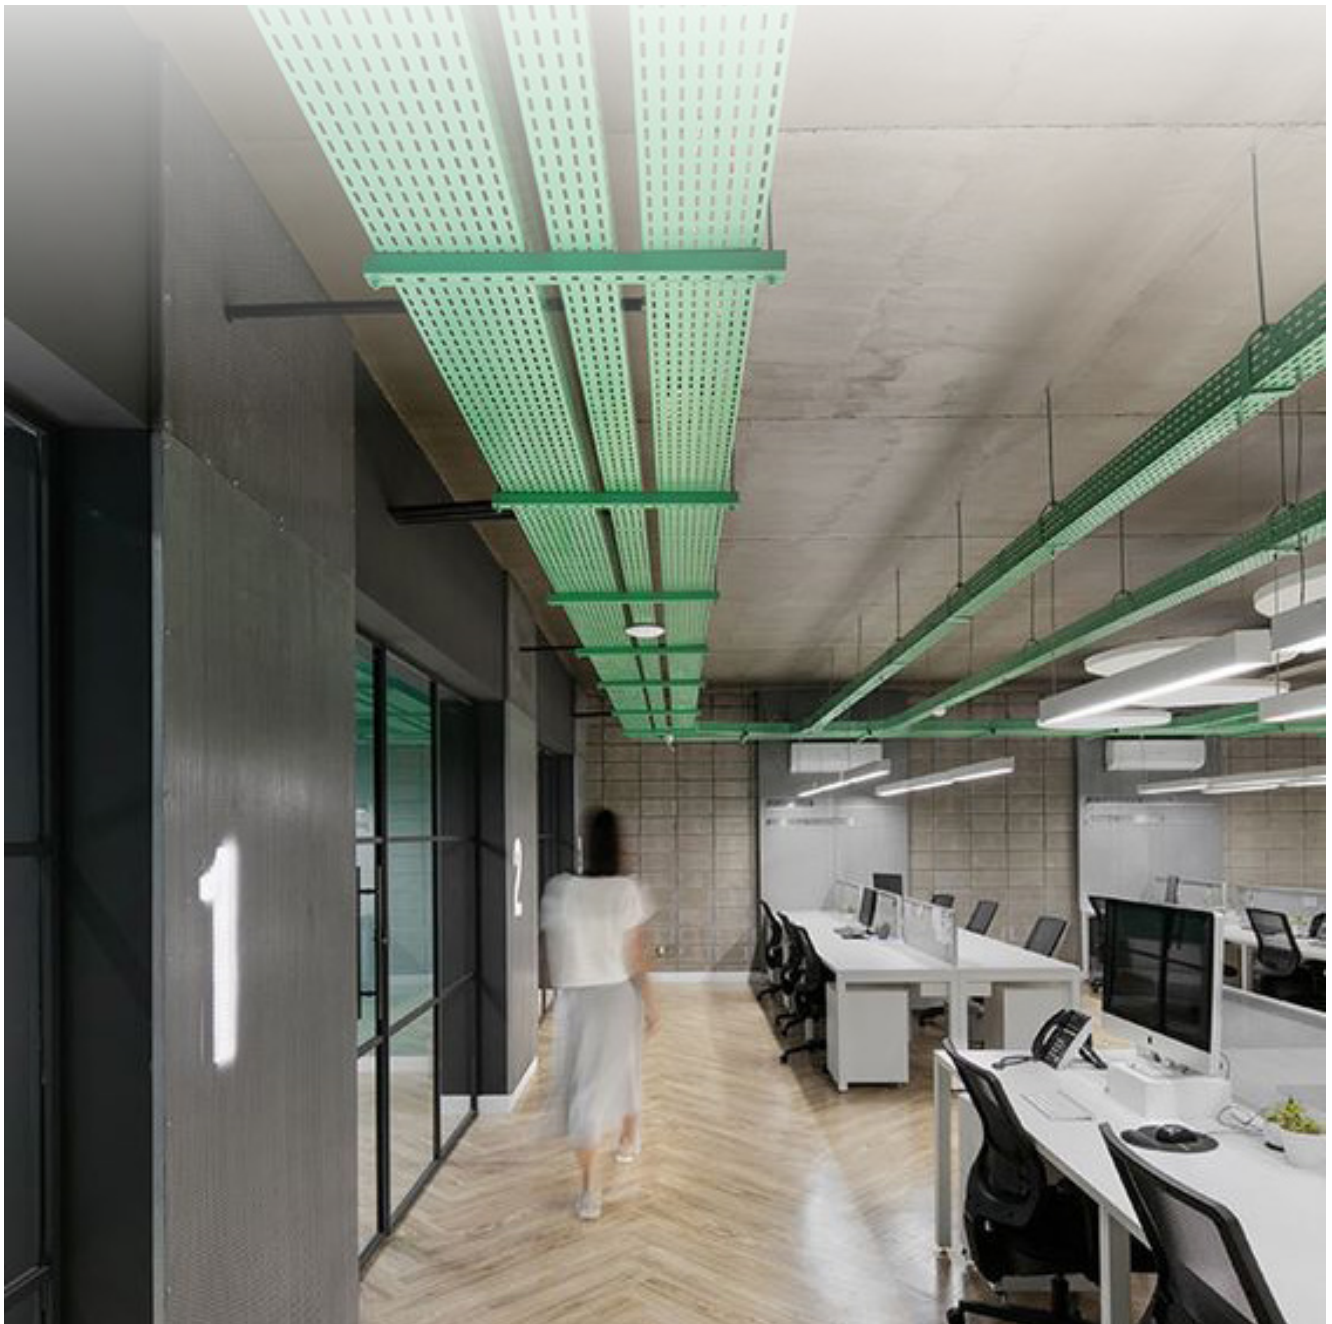

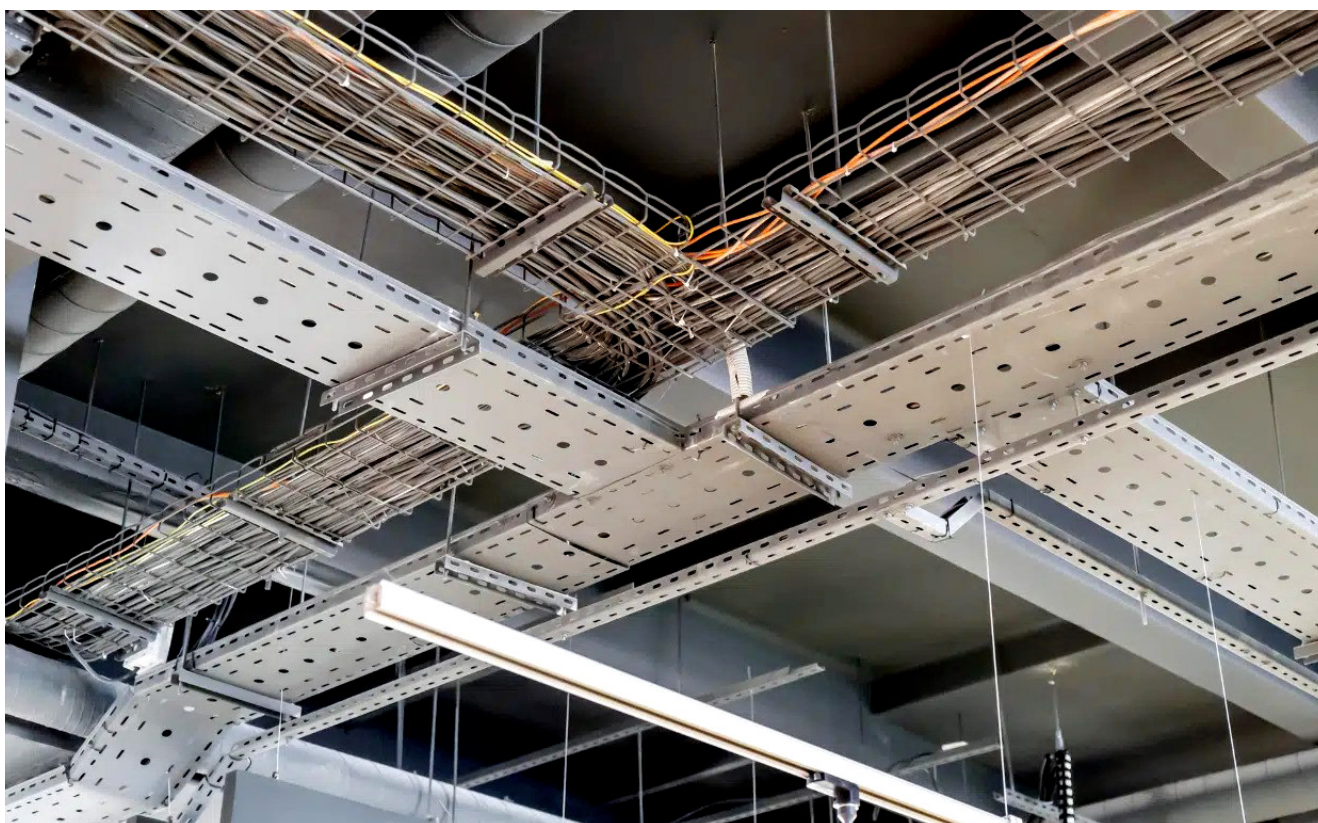

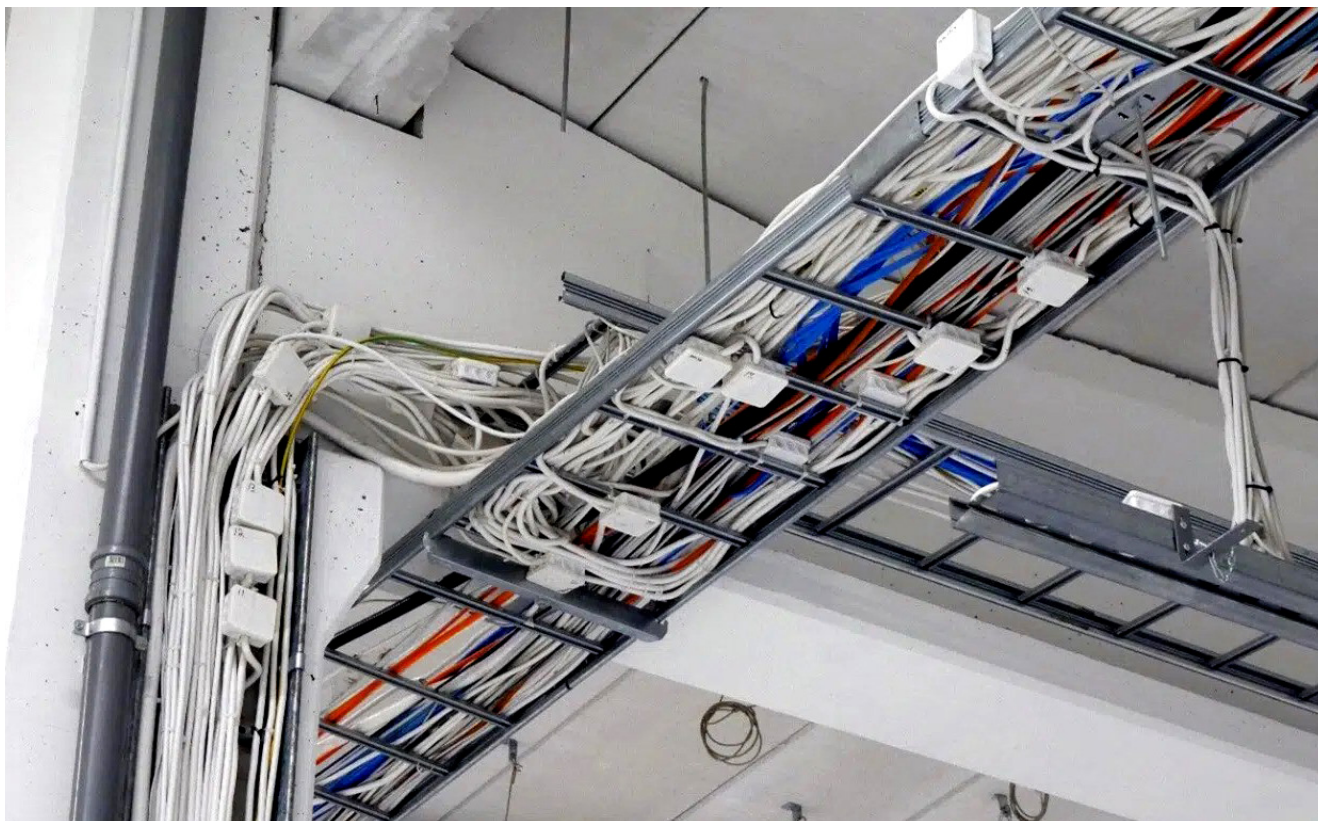

METAL LABORATORY CABINETS

CABLE TRAYS

Cable trays are essential components for organizing and supporting electrical cables in both commercial and industrial settings. Made from durable materials like steel or aluminum, they provide a safe and efficient way to route cables while ensuring easy access for maintenance. Available in various sizes and configurations, cable trays help prevent damage to cables and contribute to a cleaner, more organized workspace.
